Administration**

Memorandum

Subject: **INFORMATION**: Implementation deviation of FAA
Order 8130.21D, Procedures for Completion and Use of
the Authorized Release Certificate, FAA Form 8130-3,
Airworthiness Approval Tag

Date: November 30, 2004

Reply to
Attn. of:

From: Manager, Production and Airworthiness Division,
ATR-200

To: All Manufacturing Inspection Offices

It has come to the attention of this office that an implementation period was not included in the recently issued FAA Order 8130.21D, Procedures for Completion and Use of the Authorized Release Certificate, FAA Form 8130-3, Airworthiness Approval Tag. To allow production approval holders (PAHs) ample time to adjust or modify their computer systems to meet additional requirements stipulated in this new revision, we provide the following:

For the purposes of re-programming computer programs and revisions to quality manuals to comply with the requirements of this new revision, the FAA may grant PAHs a 6-month grace period from the date of this memorandum. One specific requirement is paragraph 14.M (17) that requires the following statement be placed in Block 13. "The part shipped under this approval is a subcomponent of [insert PMA/TSO authorization part/appliance higher assembly part number]."

Please ensure that this memorandum is given the widest possible distribution throughout your directorate and designees.

If there are any questions, please contact a member of the Airworthiness Certification Branch, AIR-230, at (202) 267-8361.

/S/
